Education

Grand Canyon University — Phoenix, AZ
B.S. Computer Science in Data Analytics; Minor in AI and Machine Learning — *Jan. 2024 – Present*

Experience

Travel Team Student Worker — Oct. 2026 – Present
Grand Canyon Education — *Phoenix, AZ*

- Tasks included assisting the travel team with payment authorizations, hotel/flight reservations, and documentation of travel receipts using Travelport+/GDS terminal/database and Microsoft SharePoint.

Canyon AI Research (CAIR) Research Intern — Jan. 2024 – Present
Grand Canyon University — *Phoenix, AZ*

- CAIR VSiD research team developing a Computer Vision model to detect hand gestures
- CAIR BCI Thought to Text research team to develop a system to read EEG brain waves that are converted to text and pushed to a TTS model
- Tasks include keeping websites up to date, documentation of research, weekly meetings, training/testing an AI model using collected data, and monthly meetings with the Canyon AI Research Organization

Customer Support Technician — Feb. 2024 – Sep. 2024
Grand Canyon University — *Phoenix, AZ*

- Quality assurance guidelines/weekly meetings with management to guide call structures and documentation procedures
- Tasks included assisting callers with technical issues such as information requests, assignment submissions, Microsoft Office installs/uninstalls, password resets, etc. over the phone and zoom meetings in a call center environment

Projects

TALON AI Agent | *Python, Streamlit* — May 2026 – Aug. 2026

- Developing an AI agent to index data from imported documents, combined with general knowledge to provide specific responses for different subject areas

Facial Emotion CNN | *Python, Streamlit, Tensorflow* — Feb. 2026 – April 2026

- Developed an agent to detect emotion based on facial expressions, the model was deployed via Streamlit and made use of a Convolutional Neural Network

Carnivore Corner Shopping Website | *Git, HTML, CSS, JS* — Dec. 2025 – Feb. 2026

- Developed an ecommerce website to promote a local carnivorous plant distributor

Brain Computer Interface Thought to Text | *Git, Python* — Jan. 2024 – April 2024; Aug. 2026 – Present

- Developing and Documenting a BCI that reads EEG brain waves and converts them to text pushed to a TTS system (managed by CAIR)

Computer Vision ML | *Git, Python, C* — Sep. 2024 – April 2026

- Developed a Computer Vision model housed on a microcontroller to be implemented on GCU's campus (managed by CAIR)
- Documented project progress/research; Maintained website with project updates and presented findings at the Canyon Undergraduate Research Symposium

Real Estate Web Scraper | *Git, Python* — June 2025 – July 2025

- Developed an AI Web Scraper in Python to gather real estate data that uses a virtual web browser to bypass CAPTCHA verification and Ollama LLM to parse relevant content

Technical Skills

Languages: Java, Python, C++, SQL, C Sharp, HTML, CSS, JavaScript,
Tools: ZenDesk, Cisco Finesse/Jabber, Git, Google/Microsoft Cloud Platform, Streamlit, Tensorflow, PyTorch, Travelport/GDS
